#### TORKY - PRE-SET WRENCHES

CDI's **TORKY** is a right angle pre-set torque wrench. Torky is designed for production torque applications that require higher values than a torque screwdriver can deliver. The comfortable design eases the strain of repeated uses. The torque value may be pre-set at the factory or it may be set by the operator utilizing a torque tester. When the proper torque value is reached, a momentary release or "break" can be felt. Available in three drive styles to fit most needs.

##### Features
